DXpedition News

Palmyra - KH5 KB1HM/KH5 operated from Palmyra Island for just over an hour around 2300Z on Sept. 30, on 14226 kHz. He said he was with the Coast Guard working on some navigational equipment. The owners of Palmyra have declined requests for DXpeditions since the disastrous K6LPL trip in early 1980, when their plane crashed, seriously injuring some of the DXpeditioners. Real-life pirates were on the island at the same time.

Ogasawara - JD JA4GXS will be /JD1 Nov. 29-Dec. 5, including CQWW CW, 80-10 meters. He'll operate from Chichi Is. QSL home call.

Heard Is. - VK0 An amateur will go to Heard this Nov., and, weather permitting, will be on the air about Nov. 9. Jim Smith VK9NS will not be going this year, and the operator has duties other than ham radio, but this represents a good chance for those who missed the two Heard Is. DXpeditions.

Fernando de Noronha - PY0F Six Brazilians amateurs will be /PY0F later this month, all bands, CW and SSB. Details to follow.

More CQWW SSB DXpeditions

K3NZ, K300, NB3L, and K3ZUF will operate VP2MW on the wrong side of Montserrat Oct. 22-29, with CW before and after the contest. Don't confuse this with The Last Resort VP2MU crew, who will beat the pants off the leeward gang in the battle of the Montserrat Multi-Multis! QSL this VP2MW operation to NB3L (N3BHF). [Please excuse obvious prejudice. -ed.]

Kurt K7CU will operate PJ1CU, a rare prefix, from St. Maarten Oct. 22-26, with low-band CW Oct. 22-24. Watch 7026, and other **General Class** frequencies. QSL home call.

Six Finish operators will put C30BBE on the air Oct. 22-26. Watch 1831, 3785, 7085, 14185, 14225, and 21295. QSL to Box 27, SF-41161, TKI, Helsinki, Finland.

Shortly Noted

- **Yemen 4W** An American ham is now in Yemen installing HF equipment. He is not a DXer and has no license, but hopes to get on the air on 14195 within a few weeks. Nothing definite, but a strong "maybe."
- **Mt. Athos** - SV/A The resident monk who has been travelling 100 km each week to study for his amateur radio license didn't show up for the exam! Next chance is Spring. Meanwhile Don Search W3AZD says he's still waiting for more papers before making a decision on the DL7FT/SV/A operation earlier this year.
- **Russians on 30 Meters** As of Oct. 1, USSR stations have 10 Meg. privileges, including RTTY. See Bandpass.
- **Saudi Arabia** - HZ HZ1AB came back on the air on. Sept. 23, after a prolonged absence. This military station runs a Yaesu 902 to a Butternut vertical. An SB-220 and tribander will be up and running soon. QSL K8PYD.
- **Tanzania** - 5H3 5H3ZO is on 14028 daily after 1700Z. He hopes to get on 80 meters soon. 5H3ZR is also active.

Still More CQWW SSB Operations

- N3JT will sign /HK0 from HK0BKX's QTH Oct. 22-27, concentrating on CW outside the contest.
- N6TJ and others will be /JY during the contest.
- W8KKF will be /C6A Oct. 22-29, with CW by W8QF.
- DA2WK is aiming for /GJ0.
- WR6R will be /KH6. KH6XX will also be on in a multi-multi effort.
- N5AU and others will operate from **Anguilla** VP2E in a multi-single effort.
- DJ6QT hopes to be on from TL8.
- And VP2MIX will be single op. No excuse for missing Montserrat this time!
- HS0A, several BY stations, and a rumored HC8DX operation round out the known activity.

Thanks N4XX and KH6BZF.

Propagation Watch

Wow! What a horrible propagation forecast! It looks rough for the DXer over the next two weeks. The only glimmer of hope is the forecast of a slight rise in solar flux around Sept. 27-28. At this point in the sunspot cycle, it doesn't take much of an increase to dramatically improve band conditions, as witness the fine conditions of early Oct., when solar flux slid up to 74, the highest values in months.

CQWW SSB Oct. 25-26 will likely have the worst 10 and 15 meters conditions in years, and even 20 meter openings will be short and weak. Since 40 is not much of a SSB band, things look pretty bleak.

QSL Help Wanted

- KA1KPH still has no word on I5YZB, QSL manager for TZ0RD. Even the Italians haven't heard of him. Did anyone ever get a card from TZ0RD?
- Bob is also still trying to confirm 5X5IU, who looks more and more like a Slim.
- KM1H seeks info on CR8AI from 1970.
- N1GL continues to seek info on HS1ALE, QSL manager for XW8CO.
- PY4OD is seeking help with XW8BF, Oct. '65; VQ9AA/D, Oct. '66; VQ9AA/F, Nov. '66; 1S9WNV, Oct. '65; and AC5A/4, Aug. '63. Any help?
- and 160-meter enthusiast WB9HAD is looking for the current address of H44IA.

QSL Help Offered

- KM1H can confirm 9V1MS, 9M8MS, TA1MGP, and TA1RF from the 1968-70 era. SASE or IRCs for reply please. KM1H, Carl Huether, 54 Hobbs Road, Pelham, NH 03076.
- and ZD8Z can be confirmed via W6CF.
- YJ8RG can be confirmed via R.S.Graham, Box 323, Sarina QLD 4737, Australia.
- The recent PY0T operation QSLs via PY1DFF, Box 90981, Petropolis 25600, Rio de Janeiro, Brazil.

Late Word on P43A

Bill Ovca N1GL is shooting for world top single-op, all band from P43A in CQWW SSB. His competition appears to be 8R1Z (see I357.) Look for P43A on 1823 on the hour, 04-11Z. Also watch 3740, listening 3790-3810, and 7050 or so. Good luck!

ICOM IC-751A

CAN YOU HANDLE THIS MUCH TRANSCEIVER?

- All HF Band Transceiver/General Coverage Receiver
- New Design
- 100% Duty Cycle Transmitter
- 105dB Dynamic Range
- All Modes Built-In USB, LSB, AM, FM, CW, RTTY
- 12 Volt Operation

The new IC-751A top-of-the-line HF base station transceiver is designed for the ham operator who demands high performance. Whether contesting or QSO'ing for pleasure, the 100 watt IC-751A incorporates the best features of the IC-751, plus brings you to the forefront with the following most-asked for additions.

More CW Control. For the CW enthusiast, the new IC-751A includes an electronic keyer unit, QSK rated at up to 40WPM, standard FL-32A 9MHz/500Hz CW filter and CW sidetone to monitor your code in RX or TX modes... great for practice!

All Amateur Band Coverage. Plus general coverage reception from 100kHz to 30MHz. May be easily modified for MARS operation.

Improved Smooth Tuning. The IC-751A features a newly designed tuning knob for velvet smooth tuning.

Added LED Annunciator. For easily identifying if you're using the tuning speed, dial, or band switching functions.

32 Memories. Mode and frequency may be stored in any of 32 memories...all the memory capability that you'll ever need.

More Stable. Even in the receive mode, the IC-751A has a sophisticated thermal sensor to monitor the internal temperature. The sensor automatically activates the cooling fan which gives maximum stability ...critical for contesting.
